

Outgoing mail server **smtp.3bbmail.com** Server requires **no authentication** and uses **port 25**

There are no other settings to configure

The screenshot shows the "Add New E-mail Account" dialog box. The "Internet E-mail Settings" section is active, with the instruction: "Each of these settings are required to get your e-mail account working." The "Server Information" section contains the following fields: "Account Type" set to "POP3", "Incoming mail server" set to "yourserver@yours.com", and "Outgoing mail server (SMTP)" set to "smtp.3bbmail.com", which is highlighted with a red box. The "Logon Information" section has "User Name" set to "test" and "Password" set to "****". There are checkboxes for "Remember password" (checked) and "Require logon using Secure Password Authentication (SPA)" (unchecked). Buttons for "Test Account Settings...", "More Settings...", "< Back", "Next >", and "Cancel" are also visible.

The screenshot shows the "Internet E-mail Settings" dialog box with the "General" tab selected. The "My outgoing server (SMTP) requires authentication:" checkbox is checked. The "Log on using" section has "Use same settings as my incoming mail server" selected. There are fields for "User Name" and "Password", and a checked "Remember password" checkbox. The "Require Secure Password Authentication (SPA)" checkbox is unchecked. The "Log on to incoming mail server before sending mail" checkbox is also unchecked. "OK" and "Cancel" buttons are at the bottom.

The screenshot shows the "Internet E-mail Settings" dialog box with the "Outgoing Server" tab selected. The "Server Port Numbers" section has "Incoming server (POP3)" set to "110" and "Outgoing server (SMTP)" set to "25", which is highlighted with a red box. The "This server requires an encrypted connection (SSL)" checkbox is unchecked. The "Use the following type of encrypted connection:" dropdown is set to "None". The "Server Timeouts" section has "Short" and "Long" sliders, with "Long" set to "1 minute". The "Delivery" section has the "Leave a copy of messages on the server" checkbox checked, and the "Remove from server after" dropdown set to "10" days. "OK" and "Cancel" buttons are at the bottom.
